Our Mission

At All American Writing Instruments (**AAWI**), our primary vision is to manufacture high quality writing instruments in the USA. As a 4th generation domestic manufacturer, we have made it our goal to keep production stateside, which includes molding our own plastic components and producing our own writing cartridges. We put American pride into every product that leaves our New Jersey factory whether it be for a small business purchasing giveaway pens or a Fortune 100 company with a comprehensive branding strategy.

Our brands reflect our commitment to develop innovative and creative products for the promotional industry. This year PenScents™, Pokka® and RePen™ join our Garland®, RevMark® and Pencil Heroes® brands to offer unique USA made writing instruments.

We are proud of our roots. We are proud of our employees' dedication which has kept us producing pens and markers for over 95 years. We are proud to be uniquely American in our category.

NEW Products

Garland®

The Garland® pen line, known for its logo dome top, has a new, refined look. Inspired by military challenge coins, we have developed the “emblem” top. The emblem is a brass piece plated in either gold or chrome. It is custom engraved in fine detail giving seamless elegance to your exceptional Garland pen.

pencil HEROES

With the success of the Pencil Heroes® we were asked for an option more suitable for adults. Our healthcare heroes and hometown heroes are more apt to write with a pen than a pencil. We listened. Your favorite characters are now available as a stick pen. In addition we have added new animal designs. Perfect for vet techs, pet stores and rescue organizations.

Garland® Art Information

File Format Submission

For optimal print quality, please submit your artwork in vector format with all text converted to outlines as an AI, EPS or PDF file. Adobe Illustrator is the preferred software. *Avoid low resolution formats like PNG and JPEG as they could result in inferior print quality.*

Dome Logo Artwork

To ensure your logo maintains its quality when reduced to the appropriate size, please provide artwork that is **at least 2" x 2"** in size. Additionally, the logo tops have a specific diameter of **.363" (9.91mm)**.

Proofing & Quality Assurance

Please be mindful of small letters and fine details as they may become illegible when reduced in size. **Reviewing your virtual proof** will help you assess the legibility of your final appearance of your artwork.

Dome logos are printed using the CMYK color mode on high resolution printers. If you're using PMS colors, Illustrator will automatically convert them to their closest CMYK equivalents. *For precise color matching and fine detail verification, consider ordering a pre-production proof.*
